RE: Thirteenth Annual Notification Letter (AHERA)

Dear Parents:

In 1986, Congress passed the Asbestos Hazard Emergency Response Act (AHERA). The law requires all schools, kindergarten through twelfth grade, to be inspected to identify any asbestos-containing building materials. The law further requires the development of a Management Plan that is based upon the finds of the inspection and to outline our intent to control the potential for exposure to asbestos fibers in our school.

In the past, asbestos was used extensively in building materials because of its insulating and fire retardant capabilities. Virtually any building built before the late 1970's contains at least some asbestos in pipe insulation when these materials begin to deteriorate or become damaged.

Our visual inspection took place on May 2005, and St. Monica School is in full government compliance.

A copy of the Management Plan is on file in the Plant Manager's Office for your review.

Sincerely,

Patricia Dulac
Principal
